	SANITIZER		

24/7 PRODUCTS ARE AVAILABLE IN THE FOLLOWING PACKAGES:

- 1 GALLON BOTTLE, 4 PER CASE
- 1 GALLON BOTTLE, 2 PER CASE
- 1 QUART BOTTLE, 12 PER CASE

GLASS WIZARD (RTU or Concentrate)	Special ready-to-use formula glass and hard surface cleaner, containing anionic detergents. Excellent non-streaking glass cleaner is also safe on Plexiglas, sneeze guards, counter and table tops, stainless steel chrome and plastic.
ORANGE STUFF RTU	Ready-to-use cleaner and degreaser for tough jobs. Use on pumps, spills, and dirty counters. Also softens gum for easy removal. An environmentally friendly water-based cleaner/degreaser. This product is blended with natural citrus terpenes and contains a completely biodegradable surfactant system. pH 10.5-11.
GREASE BUSTER	Heavy duty concentrated cleaner and degreaser. Multi-purpose formula is non-flammable, water soluble and contains butyl degreasers incorporated into an advanced chemical soil remover. Effectively removes a wide variety of soils common to industrial, institutional and commercial facilities including grease, oil, dirt, soot, food, light rust and beverage stains. May be used in and around kitchens, manufacturing plants, power plants, automotive repair shops, printing plants and warehouses. (Note: Not for use on polished or anodized aluminum, other soft metals. May be etched or discolored. This product may affect painted surfaces that have faded or aged. Use for tough floor dirt and outside problem areas. pH 13-13.5 Common dilution 60-1. Dark purple color.)
QUARRY CLEAN	Mop on cleaner for quarry tile floors. Blend of surfactants concentrated for more economical cleaning. Designed for every day use, it is biodegradable. PH is buffered for use on natural and man made stone surfaces. Dilute 1 ounce per gallon of hot water.
FLOOR MASTER	A neutral cleaner for vinyl tile floors. 2-3 ounces per gallon of mop water goes a long way. Designed for everyday mopping of light to medium soils. Won't harm or remove floor finish. Clear color with a mild fragrance. A neutral cleaner is one around 7 on the pH scale so that it won't attack the floor finish.
PURE SHINE	High solids, low maintenance floor finish. High solids means that with 3-4 coats you get as much actual polymers on the floor as with a low solids finish. New age acrylic polymers make an easy to apply and long wearing floor finish with great "lay down" gloss. This finish is designed for situations where the floor is seldom buffed after the finish is applied. It won't hurt it to buff once a week or so, but it is designed to look OK without buffing.
TOUGH SHINE	Low maintenance budget floor finish. This has 18% solids compared with PureShine 25%. A budget product that does a good job. Acrylic polymers make an easy to use yet tough long wearing floor finish that shines without buffing. Great for high traffic stores.
REFRESH	Enzymatic bathroom cleaner. This is a general purpose bathroom cleaner that is non-streaking so that it can be used on fixtures and chrome. The bacterial enzymes consume soils typically left in restrooms leaving a clean fresh smell. This is a ready to use product. It's a great product to spray on the floor around fixtures to help with smelly restrooms.
BATHROOM BUSTER	Bathroom & bowl cleaner for daily cleaning. Contains no acids. This is a mild cleaner designed for regularly maintained restrooms. Leaves all surfaces spotless, streakless and fresh. Special wintergreen scent.
POWER CLEAN	Pot and pan detergent. Super concentrated pink lotionized cleaner does the job on all kitchenware. Can also be used on walls and floors. Very concentrated using only 1/4 to 1/2 ounce per gallon of water. It is non-abrasive and easy on the hands. It can also be used as a mild general cleaner in the kitchen area. Floral fragrance with a pH of 8-8.5.
OVEN/GRILL CLEANER	Effective on greasy food soils and baked on deposits. Removes grease and carbon deposits from grills, ovens, fryers & hoods. Use with hand sprayer or dip tank. Contains Potassium Hydroxide with a very high pH (13.5-14) always use with gloves and eye protection. This is a ready-to-use product. Soak wipe, brush or spray on surface. Allow to penetrate and act on soil and grease. Then scrub and wipe off.
SANI-QUAT SANITIZER	A "spray-on" or "soaking" disinfectant, sanitizer, fungicide, and viricide used for sanitizing in public use areas such as the food service environment.
